

8th International Siberian Early Career Geoscientists Conference Novosibirsk on June, 13-24, 2016

IAGOD-sponsored 8th International Siberian Early Career Geoscientists Conference was held in Novosibirsk on June, 13-24. 105 students and young scientists took part at the meeting, which included wide range of scientific sessions: Magmatism and Metallogeny, Petrology and Geochemistry of Igneous and Metamorphic Rocks, Mineral and Ore Deposits and Economic Geology etc. The conference began with two-day lectures, which were led by world class researchers from Russia, Czech Republic, Norway, and Holland etc. Lectures cover various subjects and attracted interest of early-career geoscientists. The schedule of the conference included excursions through Novosibirsk city, excursion to Novosibirsk Zoo, to the Historical and Architectural Open-air Museum, as well as ice-break party and closing ceremony. Also there were organized two post-conference field trips: «Geology Magmatism and Metallogeny of Gorny Altai and Mineralogy» - 6-day excursion with 35 participants and «Metallogeny of The North-Western Altai» - 5-day excursion with 10 participants.
