PACRIM is a quadrennial congress that focuses on research, exploration and development of mineral deposits around the Pacific Rim. Its appeal extends far and wide to geologists, geophysicists, geochemists exploring in the Pacific Rim and people interested in the mineralisation processes of active tectonic margins, and those developing projects following discovery in these regions.

Sponsorship and Exhibition Opportunities
PACRIM 2015 will attract mining professionals and geoscientists involved in developing projects around the Pacific Rim or in terrains with a similar geodynamic history. Opportunities are now available for sponsors and exhibitors to create, develop and enhance your organisations’ profile leveraging from target marketing, media exposure and brand recognition.

CALL FOR ABSTRACTS
Abstracts are invited for PACRIM 2015. All abstracts will be reviewed by the organising committee and session convenors’ and authors of approved abstracts will be required to submit an extended abstract not exceeding 1400 words. Abstract submission is via the congress website.

Congress Themes
For a full list of themes please visit the congress website.
- Mineralisation Processes
- Project and Development
- Mineralisation Styles Exploration and Mining Investment
- Provinces and Case Studies

Session Convenors
- Tom Blenkinsop, Cardiff University, United Kingdom
- Huayong Chen, Guangzhou Institute of Geochemistry, China
- Wei Terry Chen, The University of Hong Kong, Hong Kong
- Tony Christie, GNS Science New Zealand
- Dave Craw, University of Otago, New Zealand
- Paul Cromie, Anglo American Exploration (Australia)
- Cornel E.J. de Ronde, GNS Science, New Zealand
- Steve Garwin, Independent Consultant, University of Western Australia and Australian National University
- Rich Goldfarb, Centre for Exploration Targeting, USA
- Anthony Harris, Newcrest Mining Limited
- Craig Hart, University of British Columbia, Canada
- Terry Hoschke, Altermex
- David Huston, Geoscience Australia
- Robert Hough, Minerals Down Under CSIRO
- Ross Large, University of Tasmania
- Jianwei Li, China University of Geosciences, China
- Larry Meinert, U.S. Geological Survey, USA
- Steve Prevec, Rhodes University, South Africa
- Roger Skirrow, Geoscience Australia
- Andrew Wurst, Global Barrick Gold Corporation, Canada
- Khin Zaw, University of Tasmania
- Mei-Fu Zhou, University of Hong Kong, Hong Kong
